Education

University of Waterloo — Waterloo, Ontario
Honours Bachelor of Mathematics – Combinatorics & Optimization, Statistics & Computing — *Sept 2023 – May 2028*

Experience

Software Developer — Sept 2026 – Dec 2026
TextNow

- Engineered VoIP voicemail functionality using **Kotlin** and **Go** for **Yello!**, an android calling app, helping push it to market for a projected **1.2M** daily users.
- Developed a custom Mobile Device Management (MDM) prototype to replace a third-party vendor, enabling an in-house device management solution with **$200K+** in projected annual savings
- Engineered an AI agent management platform adopted by **90%** of engineers, implementing Magentic orchestration, context management, dynamic UI generation (JEV), token optimization, and intelligent model routing (LiteLLM)

Full Stack AI Developer — Jan 2026 – Apr 2026
Revvity

- Modernized a legacy VB6 newborn screening platform into an AI-native system with real-time collaboration (AWS, React, Python), accelerating diagnostic reporting **3–5x** across 5 labs and 2000+ users
- Reduced competitive intelligence reporting time by **85%** by developing an automated competitor monitoring system using **Node.js** and **Python**.
- Built Company-Wide Gamified Training Platform for employee training, with live AI Generated Feedback for **over 10,000+ employees**
- Improved React application performance by **34%** by refactoring shared component packages and integrating a machine-readable design system.

Software Engineer — May 2025 – Aug 2025
BDO IT Consulting

- Reduced Dayforce development delivery time by **40%** by **fine-tuning** an LLM on domain-specific data to automate XMLST code generation
- Designed an **MCP Server** using Python and **Power Platform** for Microsoft SharePoint, facilitating access rights management across **200+ employees**
- Worked on the backend for a transaction monitoring tool for one of the country's largest banks, using **ASP.NET** and **MongoDB**

Software Developer — May 2024 – Aug 2024
BDO IT Consulting

- Led development of a Generative AI compliance platform using **Next.js**, **Python**, and LangChain, implementing corrective **cRAG** to reduce legal research time by **40%**.
- Deployed application using **Docker** on a Virtual Machine to **100+ Users**, utilizing microservices to optimize resources and keep running costs at a minimum

Technology Consultant — Jul 2023 – Aug 2023
PricewaterhouseCoopers

- Increased IT incident resolution efficiency by **60%** by developing an automated ticket management system using **C#**, **ASP.NET MVC**, and **SQL Server**.

Projects

AI-Driven Legal Platform | *React, Python, LangChain, MongoDB* — Jan 2025 – Present

- Developed an AI-driven legal platform, "Lalwa" to allow Law Professionals to access the Mauritian Supreme Court database, retrieve relevant cases, and generate legal documents

Technical Skills

Languages: Python, TypeScript, C, C#, Go, Kotlin, SQL
Frameworks/Libraries: React, Next.js, Three.js, FastAPI, ASP.NET,PyTorch, LangChain, Scikit-learn
AI/Data: cRAG, MCP, MongoDB
Tools: AWS, Azure, GCP, Docker, Kubernetes, Git
